

ALGOVITA

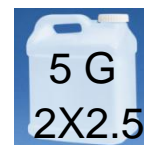

ALGOVITA is an auxiliary nutrient compound fortified with natural biostimulants, carbon synergists, and fermented plant extracts. It is designed for early season use on cotton to produce the following results:

1. More Rapid Crop Development
2. Development Of A Prolific Root System, (Length And Mass), Making The Crop More Efficient In The Use Of Water & Soil Nutrients

ALGOVITA should be applied when the crop has 5-9 true leaves to achieve a more rapid crop development. One follow up application in 2-3 weeks will encourage heavy squaring.

ALGOVITA IS AN EXCELLENT EARLY SEASON COMPANION PRODUCT WITH BOLL KING WHICH IS APPLIED LATER IN THE SEASON. THE COMBINATION IS AN EXCELLENT YIELD ENHANCING PROGRAM.
