

CYCLE AG

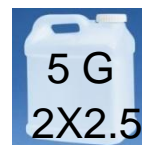

CYCLE AG is a unique and proprietary formulation of calcium chelated with cyclic acids.

When applied to the soil CYCLE-AG not only provides immediately available calcium for the crop, its cyclic acids solubilize calcium in the soil that has been unable to the crop.

Application Benefits:

- EXCELLENT IN THE MANAGEMENT OF SODIUM IN THE ROOT ZONE OF ANY CROP.
- CAN BE USED DIRECTLY IN THE SEED FURROW.
- CAN BE USED IN DRIP IRRIGATION.
- MIXES WITH LIQUID NITROGEN SOLUTIONS FOR SIDE DRESS APPLICATION.

DO NOT MIX WITH HUMIC ACIDS
