CYCLE AG

SOIL AMENDING CALCIUM

DESCRIPTION

CYCLE AG is a proprietary formulation of super chelated calcium for soil application when applied as directed the strong chelates will cycle in the soil solubilizing additional calcium for crop use and/or mitigating the effects of sodium.

COMPATIBILITY

CYCLE AG is tank mix friendly with a wide range of other nutrients but must be dispersed in the tank first. Do not attempt to mix with other nutrients in an undiluted form. Do not mix with humic Acid. Always check compatibility with a standard quart jar test prior to tank mixing.

APPLICATION

Apply with any equipment that delivers material to target area. Surface applications should be watered in lightly within 8 hours. Can be lightly tilled in or injected into row

RATES AND DIRECTIONS

For broadcast rates for soil sodium remediation, contact your CYCLE Ag distributor.

- BAND SURFACE APPLICATIONS: Apply 1.5-2.0 pints per acre in 12 inch band.
- ROW INJECTION: Apply 1.0-1.25 pints per acre injected into the seed bed.

GENERALLY CAN BE APPLIED TO ALL CROPS.
