# HISUL PLUS

## AUXILIARY CROP NUTRIENT

### DESCRIPTION

**HISUL PLUS** is a proprietary formulation of colloid sulfur sequestered in natural plant extracts. It is designed for use on a wide array of crops to facilitate growth, development, and to enhance fruiting response.

### COMPATIBILITY

Product is tank mix compatible with most nutrient solutions and pesticides. Where conditions are unknown, a standard quart jar test is recommended prior to tank mixing.

### APPLICATION

Apply as a light foliar mist to all foliage. Do not overspray to runoff.

### RECOMMENDATIONS:

- ❖ **COTTON:** For early season crop establishment, apply 1.5-2.0 pints per acre as soon as true leaves are formed. Pin head square stage is an excellent time to repeat applications for increased fruit set.
- ❖ **CORN:** Make one application directly over top at the 3-5 blade stage of 2.0 pints per acre.
- ❖ **SOYBEANS:** Early season (1.0 – 1.5 pint per acre) at third trifoliate stage. Another application of 1.5 – 2.0 pints per acre is recommended immediately pre bloom.
- ❖ **RICE:** Make one application of 2-3 pints per acre at green ring stage.
