

# IMPACT-N

**IMPACT-N** is a stabilized source of foliar nitrogen for greatly increased uptake, reduced volatility, & superior crop safety. IMPACT-N is slow drying on leaf surface which means less crystallization in marginal conditions. This feature also makes it an excellent tank mix companion for insecticides, fungicides, & other nutritional compounds.

## IMPACT-N PRODUCT FEATURES:

- Contains slowly available nitrogen
- Excellent source of foliar nitrogen
- Stabilized nitrogen form
- Superior crop safety
- Increased plant absorption, translocation, & remobilization of essential nitrogen

**IMPACT-N Application Information--** For use on most specialty & field crops for:

- Enhanced growth & quality
- Correction of nitrogen deficiencies
- Crop stress recovery
