

INTRUDER-KA

SUPERIOR SPRAY ADJUVANT

INTRUDER-KA is a proprietary superior spray adjuvant. It combines the characteristics of superior spreading & sticking of pesticide sprays with the effects of stomata opening for very rapid absorption by the target species.

CAUTIONS!!!

- Never use intruder with any pesticide that could cause crop damage if it is absorbed by the crop.
- Do not use intruder in conjunction with copper fungicides or Bordeaux mixtures as the absorption by the crop can cause damage and fungistat effects will be lost
- Do Not use with fungistats!

INTRUDER-KA is ideal for use with;

- All systemic insecticides and fungicides
- Defoliant and Dessicants
- Glyphosates
- Phenoxy

Always apply pesticides according to the pesticide label.

Contrary use is against the law
