

# KIIK PLUS

## Nutritional Seed Dressing & Planter Box Lubricant

**KIIK PLUS** is a proprietary formulation of French milled talc which functions as a planter box lubricant. It is fortified with nutritional compounds that will help to sustain the newly germinated seedling, and natural seed germination synergists that promote rapid water imbibitions and germination even under harsh field conditions.

**KIIK PLUS** in all its formulations can be used in all modern planters that specify a seed lubricant and if used at rates specified on product label will not foul seed monitors.

Since most crop seeds have different requirements **KIIK Plus** comes in crop specific formulations to meet those crop needs.

- **KIIK PLUS-HM**, a higher molybdenum formulation ideal for soybeans and other legumes
- **KIIK PLUS –SCS**, seed corn special for any and all types of Corn & Grain Sorghum
- **KIIK PLUS-CS**, Cotton special for all cotton seed
- **KIIK PLUS-Peanut Special**, For peanuts

**KIIK PLUS IN ALL ITS FORMULATIONS CAN BE USED  
ON SEEDS THAT HAVE BEEN PRETREATED WITH  
FUNGICIDES & INSECTICIDES**
