

# KIIK

**KIIK** is a nutritional seed dressing and germination synergist. It contains plant nutrients sequestered in a base of organic acids, plant fermentation extracts, enzymes, and extracts of *Ascophyllum Nodosum* and *Chondrus* seaweed. KIIK offers the following benefits to the user:

## **BENEFITS:**

- Rapid Germination & Emergence
- Reduced Seedling Mortality
- Prolific Root System
- Rapid Crop Development

## **KIIK is formulated for specific crop :**

- KIIK-HM, high molybdenum for soybeans, edible beans, peas & legumes
- KIIK-SCS, for corn & grain sorghum
- KIIK-SSG, for all small seeded grains
- KIIK-CS, for cotton

## **KIIK FEATURES:**

- It contains germination synergist that induce rapid germination and emergence when the seed is placed in a moist soil, or after a rain.
- Other biostimulant ingredients induce prolific root growth enabling your plants to utilize any soil nutrients and available water to the maximum.
- A wide array of nutrients in the KIIK feed the newly germinated seedlings and get them off to a great start.
- KIIK cannot increase (%) germination, (a dead seed is dead). What it will do, is dramatically reduce seedling mortality due to low vigor.
