

# MIXXIT

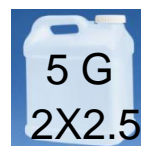

**MIXXIT** is a proprietary blend of agents that act as buffering & compatibility agents in application tanks where there is a need to improve stability. It is specifically designed to significantly lower the pH of water and certain soil surfactants.

**SINCE FORMULATIONS DIFFER & RATES VARY,  
CHECK COMPATIBILITY OF VARIOUS MIXTURES  
DESCRIBED ABOVE PRIOR TO TANK MIXING.**

## **MIXXIT** Application Information:

- For use on most specialty & field crops for tank mixing liquid fertilizers & pesticide
- When mixing liquid fertilizers & liquid micronutrients
- When pesticides are applied with single source liquid fertilizers
- Recommended with most pesticide applications made with higher pH water
