

# RETRIEVE

## CROP START SYNERGIST

READ ENTIRE LABEL BEFORE USE.  
SHAKE WELL BEFORE USE.

### **GUARANTEED ANALYSIS**

Total Nitrogen	-----6.0%
6.0% Urea Nitrogen	
Available Phosphoric Acid (P2O5)	-----3.0%
Soluble Potash (K2O)	-----4.0%
Zinc (Zn)	.20%

Derived from: Urea, Potassium Phosphates, and Zinc EDTA

### **CAUTION:**

#### **KEEP OUT OF REACH OF CHILDREN**

Harmful if swallowed. In case of contact with eyes, flush immediately with copious amounts of water for 15 minutes. If irritation persists, consult a physician. Avoid contamination of skin and clothing. Wash with soap and water.

**WARRANTY AND CONDITION OF SALE:** Manufacturer warrants that this material conforms to the chemical description hereon and is reasonably fit for use as directed. No other warranty is made, either expressed or implied. Buyer and user, therefore, acknowledges and assumes all risk and liability resulting from handling, storage, and use of this material.

Manufactured By: ProTea Botan US, INC.

1039 Autumn Oaks Circle  
Collierville TN 38017

### **DESCRIPTION:**

**RETRIEVE** is a proprietary formulation of plant nutrients sequestered in a concentrated organic acid and fortified with natural biostimulant combinations. It is designed for use as an in-furrow crop starter solution to aid in rapid seed germination, early emergence and rapid seedling establishment. The concentrated organic acid fraction also makes soil nutrients such as phosphates more available to the crops.

### **COMPATIBILITY:**

**RETRIEVE** should not be tank mixed with non-chelated micronutrients or with calcium solutions. Where compatibility is unknown, always pre-test with the standard quart jar method prior to tank addition.

### **HOW TO APPLY:**

**RETRIEVE** should be applied directly into the furrow at planting. Ideally it will be sprayed directly onto the seed to achieve the benefits of the natural germination synergists.

### **RATES OF APPLICATION:**

The general rate of application for in-furrow application at planting is 3-4 quarts per acre depending on soil texture.

- ❖ Light Soils- Apply 3.0 quarts per acre
- ❖ Heavy Clays – Apply 4.0 quarts per acre

**IMPORTANT NOTES:** Soil (pH) should be 6.0 or greater and Exchangeable soil phosphorus must be >40 PPM, for good results.
