DESCRIPTION

4-EVER GREEN is a proprietary auxiliary nutrient formulation designed for foliar application on intensively managed turf grasses such as golf courses and athletic playing fields. It contains antioxidants, amino acids, organic complexes, enzymes, and natural fermented plant extracts. Scheduled spraying throughout the growing season will assure the desired dark green color.

COMPATIBILITY:

Never tank mix with phosphates or amines. Always pre-determine spray tank compatibility with standard quart jar method.

APPLICATION:

Apply as a light foliar mist in 30-50 GPA (285-475 L/Ha). Do not water in or irrigate after application.

GENERAL RECOMMENDATIONS:

For general turf use, apply 1.5-3.0 fl. oz. per 1000 ft^2 . (45-90 ml per 100 m^2). Repeat every 2-3 weeks throughout growing season. For specific iron deficiencies, apply 3-5 fl. oz. per 1000 sq. ft. (90-150 ml per 100 m^2 .) and repeat in 7-10 days.
