

IMPORTANT NOTE:

BLACK ALGAE IS THE RESULT OF LOW SOIL OXYGEN, POOR PERCOLATION OF WATER, AND WET CONDITIONS AT THE SOIL SURFACE. THESE CONDITIONS MUST ALSO BE MANAGED TO ACHIEVE SUCCESS.

CAUTION:

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. In case of contact with eyes, flush immediately with copious amounts of water for 15 minutes. If irritation persists, consult a physician. Avoid contamination of skin and clothing. Wash with soap and water.

WARRANTY AND CONDITION OF SALE: Manufacturer warrants that this material conforms to the chemical description hereon and is reasonably fit for use as directed. No other warranty is made, either expressed or implied. Buyer and user, therefore, acknowledges and assumes all risk and liability resulting from handling, storage, and use of this material.

Black Widow

PROFESSIONAL TURF USE

**READ ENTIRE LABEL BEFORE USE.
SHAKE WELL BEFORE USE.**

DESCRIPTION:

BLACK WIDOW is a proprietary blend of concentrated bacteria that is designed for use on turf areas affected by the accumulation of black algae. These select strains of bacteria colonize, rapidly reproduce and compete with the algae for food sources normally consumed by the algae, eventually depriving the algae of nutritional support.

TANK MIXING:

Do not mix with copper compounds or fungicides. Since the objective is to deprive algae of food, nitrogen and phosphate should not be added to spray mixture. Tank mixing with a superior soil penetrating surfactant is strongly recommended.

HOW TO APPLY:

Apply recommended rate to affected areas in sufficient water for coverage.

RECOMMENDED RATES:

- ❖ Early Stages of Infestation: Apply 6-9 fl. oz. per 1000 ft^2 . and repeat at 4-6 fl. oz. in 10-14 days.
- ❖ Heavy Buildup: (Turf loss areas), Apply 9-12 fl. oz. per 1000 m^2 , and repeat at 6.0 fl. oz. every 10-14 days until algae reaches manageable levels.

FOR FLORIDA:

We recommend that you follow the Golf Course BMP's at: <http://www.flaes.org/pdf/Golf%20Course%20BMP's.pdf>
