

DEFENDER: is a unique formulation of manganese citrate and magnesium citrate that is fortified with natural biostimulants, enzymes, fermentation extracts and proprietary **SYNERGIZE C-3** and Energize FE. **DEFENDER** is a highly soluble powder. The user simply fills the container on site, shakes vigorously, and is ready to spray. **DEFENDER** is very high in manganese in a highly absorbable form along with magnesium. These two nutrients are critical to many enzymatic functions of plants, and in energy conversion. Both manganese and magnesium are critically low in availability in most soil conditions.
