DESCRIPTION

DURA TURF is a proprietary formulation of concentrated potassium fortified with a Carbon synergist, (**SYNERGIZE C-3**), enzymes, low molecular weight organic acids, fermented plant extracts, and extract of *Ascophyllum nodosum* and *Chondrus crispus*. It is designed for foliar use on all intensively managed turf grasses. When used as directed, **DURA TURF** is rapidly absorbed by the turf where it is immediately available to support the physiological and biological functions of the grass.

COMPATIBILITY:

DURA TURF is compatible with most other nutrient compounds and fungicides, but when compatibility is unknown always pre-test with standard quart jar method prior to tank mixing.

HOW TO APPLY:

Apply with any equipment that delivers a fine even mist to the foliage of the turf. **DO NOT OVER SPRAY TO RUNOFF.** Allow 5-6 hours after application before watering.

RATE OF APPLICATION:

As general turf maintenance, apply 4-5 fl. oz. per 1,000 square feet as indicated by turf conditions.

- **PRE-TOURNAMENT:** Apply 5-6 fl. oz. per 1,000 square feet.
- **HIGH TRAFFIC AREAS:** Apply 6-8 fl. oz. per 1,000 square feet and repeat at 10-14 days intervals.

FOR FLORIDA:
