Manufactured By: ProTea Botan US, INC.
1039 Autumn Oaks Circle
Collierville TN 38017

NET CONTENTS: 12 / 235 gram Pellets

DESCRIPTION:

CaLPaL is a blend of micronized calcium, organic acids, and water dispersion agents designed for use on intensively managed turf. **CaLPaL** can be applied with most hose end applications.

GENERAL DIRECTIONS:

Place pellet in the hose end applicator and apply in a syringing type manner.

- Thoroughly drench localized dry spots.
- Syringe cooling cover area as you normally would.

Can be used as often as desired.

RATES:

Rate of application will depend on water flow rate and duration on target area. A pellet should last 30-40 minutes if water pressure is 40-65 PSI.

FOR FLORIDA:

We recommend that you follow the Golf Course BMP's at:
