**FOR FLORIDA:**

## **DESCRIPTION**

**PENETRAR** is a proprietary blend of superior soil penetrants for use on all turf areas where water infiltration is an issue. Pellets dissolve slowly with water flow and are ideal for hand watering problem areas.

## **APPLICATION:**

Fit pellet into most hose end applicator. Allow to dissolve with the water flow as you are watering or syringing. Under most water conditions, pellets will dissolve in approximately 30-45 minutes at water pressures of 50-80 PSI (3.5-5.5 kg/cm).

## **GENERAL RECOMMENDATION:**

As a general rule, **PENETRAR** should always be applied first even when **RETENTION** is an issue, especially on localized dry spots. For severe penetration problems thoroughly drench area. Syringe normally.
