No other warranty is made, either expressed or implied. Buyer and user, therefore, acknowledges and assumes all risk and liability resulting from handling, storage, and use of this material.

Manufactured By: ProTea Botan US, INC.

1039 Autumn Oaks Circle  
Collierville TN 38017

**NET CONTENTS: 2.5 USG / 9.45 L**  
28.2 lbs / 12.82 Kg

### **DESCRIPTION:**

SENEX-TG is a proprietary formulation of major and secondary nutrients designed for foliar supplementation of nutrition on intensively managed turf grasses. Nutritional components provide for turf energy, cell division, and mitigate respiration stress. SENEX-TG is fortified with natural fermentation extracts, plant enzymes, and specific organic acids that aid in absorption.

### **COMPATIBILITY:**

SENEX-TG is compatible with many other nutritional compounds, insecticides, and fungicides. It will tend to lower the tank mix pH and could affect compatibility with some compounds. Always check compatibility with standard quart jar method prior to tank mixing.

### **APPLICATION:**

Apply with any equipment that delivers material as a fine foliar mist to plant foliage. Best results will be realized with spray volumes of 20-40 GPA, (60-120 fl. oz. per 1,000f<sup>2</sup>).

### **RATES AND DIRECTIONS:**

- ❖ **Athletic Playing Fields:** Apply 1.0-1.25 fl. oz. per 1,000f<sup>2</sup> early in the growing season and repeat every 14-21 days at 0.75-1.0 fl. oz. per 1,000f<sup>2</sup> throughout active growing season.
- ❖ **Golf Greens and Tees:** Apply 0.75-1.0 fl. oz. per 1,000f<sup>2</sup> in early spring and repeat every 12-14 days throughout season.
- ❖ **Fairways:** Apply 0.75-1.0 fl. oz. per 1,000f<sup>2</sup> every 21-28 days throughout growing season
- ❖ **Sod Farms:** Apply 2-3 pints per acre in early spring and repeat as needed throughout growing seasons.

**FOR FLORIDA:**

We recommend that you follow the Golf Course BMP's at: <http://www.flaes.org/pdf/Golf%20Course%20BMP's.pdf>
